

Building Supply Controller Ver 7.1 Bulletin 0001
October 14, 2003
Freeze Count Entry
Contributed by Mainframe Associates

Menu Plate: BBDEDB

The Freeze count entry screen has been enhanced to display a list of entries rather than individual records.

Different sort options are available to list the item numbers.

Screen Sample of sort options:

BBDEDB		Frozen Inventory		7.1.7	
		[Sort Option 1]			
		By Item Number			
		By Department			
		By Line Code			
		By Location			
Item	Description			Frozen	Actual

Select a sort method....

Bulletin 0001 - Freeze Count Entry continued

You can move through this list with the cursor and paging keys, and a count value can then be entered. F9 is also available to quickly jump to a record in the file by description or by item number. Once all changes have been made, F10 will save the changes to file. F1 can be used to abort all changes (a confirmation will be asked for if changes have been made). When a sort (other than item) has been selected, the corresponding dept, line or location code will print in the lower section of the screen. Vendor and current list price will also display in this section. Only items that have not yet been posted will appear.

Sample Edit Screen:

BBDEDB		Frozen Inventory			7.1.7
