

## Controller Series Ver. 7.2 Bulletin 0014

### Dead/Slow Stock Report

This powerful new feature reports items with little or no sales for a particular period of time. Inventory managers can now quickly identify stock that needs to be moved or returned. General Managers can use this tool to identify opportunities for improvements in inventory management. The report is available from Menu Plate BBFS.

Users build their report on: Time Periods, QOH, Qty Sold, Department, Line and Supplier. Output options include Summary or Detail report, and user's choice of Screen Display, Printer (selectable), Export to Workstation, or Email. The following is the Dead/Slow Stock Report Input Screen.

BBFS		Dead/Slow Stock Report		7.2.7.011
Store Number	[ * ]	All Stores		
Starting Period	[ 0408 ]	August, 2004		
Ending Period	[ 0503 ]	March, 2005		
QOH Greater Than / Eq	[        1 ]			
Qty Sold Less Than / Eq	[        0 ]			
Starting Department	[ * ]	All Departments		
Ending Department	[   ]			
Starting Line Code	[ *        ]	All Line Codes		
Ending Line Code	[        ]			
Starting Supplier	[ *        ]	All Suppliers		
Ending Supplier	[        ]			
Summary or Detail	[ D ]	Detail

				Process

The user can use the filter to select inventory by various categories. The report is available in Detail or Summary format.

The following sample report shows all items in ABC Distribution's inventory which had no sales in the last year. ABC has \$3046.26 in "dead" stock, which can be put on sale or special promotion and this money re-invested in faster turning stock.

03/10/2005		ABC Distribution Dead/Slow Stock Report Consolidated for all stores. For Periods: June, 2004 to March, 2005 For All Departments For All Line Codes For All Suppliers For Items with QOH greater or equal to 1 For Items with sales less than or equal to 0					Page: 1
