

## Controller Series Ver. 7.3 Bulletin 0017

### QOO Lookup

A new feature has been added to the SHORT Inventory and Main Inventory data entry screens.

When you input an item number, a new Fkey has been added to allow display of Quantity on Order values. Selecting sF2 will now display all Quantities on order. This includes Regular, Booking and Special/Promo Orders.

The following is a sample of this new display:

| BBBB Main Inventory Screen 7.3.2 |        |         |                            |           |              |              |    |    |     |
|----------------------------------|--------|---------|----------------------------|-----------|--------------|--------------|----|----|-----|
| Item #                           | [1130] | 1.      | [Annual 2" Pot]            |           |              |              |    |    |     |
| 3. Taxable                       | [YYYY] | GP / GP | Duty 0.00%                 | GST 7.00% | PST 7.00%    | ENV \$ 0.00  |    |    |     |
| 4. Department                    | [A]    |         | Duty 0.00%                 | GST 7.00% | PST 7.00%    | ENV \$ 0.00  |    |    |     |

ETA is based on the first expected arrival date of the item. This is maintained by the Purchase Order program.

Regular QOO - items purchased that are considered as part of the normal ordering process

Booking QOO - items purchased that will be delivered at a later date

Promo QOO - items purchased that are for an upcoming sale
